# INDUSTRIAL VISITS

Industrial Visits are an essential part of the academic curriculum in PGDM Program. Such educational/industrial visits offer students a great exposure to explore real-working environments along-with a practical perspective of a theoretical concept relevant to their academic domain. Apart from this, the industrial visits help in bridging the gap between theoretical learning and practical exposure by giving students the first-hand exposure to identify the inputs and outputs for different business operations and processes performed at the workplace.

VSM understands the significant importance of Industrial Visit for a student's overall development. To compliment the classroom learning with practical exposure, VSM organizes various Industrial Visits for its management students in-order to gain practical insights into industry operations and be ready for the corporate world.
